

# NO RESCUE SITUATION IS THE SAME.

That's why we provide a variety of offerings – along with the expertise and training you count on from fall protection's most responsive partner.

## DESCENT

The Evacuation/Descent System offers a comprehensive yet compact kit that is easy to set up in an emergency evacuation.

022-6052

022-6063

## RESCUE

The Rescue/Descent System and Kit offer both descent and lifting capabilities making them ideal for rescue situations.

*(Systems offer the essentials while upgraded Kits include extra accessories.)*

**RESCUE  
PLANS**  **SAVE  
LIVES**

**Rescue training helps reduce fall-related deaths.** The odds of a fall turning fatal are **76% lower** for those who had self-rescue training compared to those who did not.

*Center for Construction Research & Training, 2021*

022-6051 50'  
022-6052 100'

022-6053 - 022-6056  
200', 300', 400', 500'

## DESCENT

## OSHA 1926.502 (d) (20) states:

The employer shall provide for prompt rescue of employees in the event of a fall or shall assure that employees are able to rescue themselves.

OSHA requires written self and assisted rescue plans specifically for each worksite. The plan must describe the equipment, where it is stored and how to inspect it.

## Individual Components

022-6069	Rescue Assist Sling	<ul style="list-style-type: none"> <li>• Lightweight and easy to deploy</li> <li>• Wrap around construction with self-locking hook</li> <li>• Universal sizing adjusts to fit most body types</li> <li>• Padding provides comfort where it's needed</li> </ul>
