

4-Person Temporary Horizontal Lifeline System

To meet the needs of a challenging work environment, FallTech® offers a 4-Person Temporary Horizontal Lifeline System with premium polyester double braid rope for up to four workers. The FallTech® Temporary 4-Person Horizontal Lifeline is a completely engineered system with all of the components necessary to quickly install a complete horizontal lifeline system without the use of tools.

4-Person Temporary Horizontal Lifeline System Kit

- Features high-strength, durable 5/8" double braid polyester rope lifeline with steel thimble and stitched end-termination
- Exclusive line tensioner assembly with integral energy absorber and anchorage-end carabiner
- Includes 4 connecting rings, 2 heavy-duty pass-through anchor straps and additional thimble-end carabiner
- 18" gear bag provides suitable storage and transportation of the HLL system
- 4-person HLL systems are a component of a complete PFAS and are engineered for use with user's self-retracting lifelines or energy absorbing lanyards
- Meets OSHA standard 1926.502
