

THINK INSIDE THE BOX

The Powerblanket® Hot Box saves you money by keeping your products from freezing without the risk of overheating. For example, Vern Fiehler, of Quick Road Repair in Alaska, saved money by keeping his product from burning up, which is what happened with his old method. He met with the field maintenance crew of the Juneau Alaska International Airport to demonstrate his product called Instant Road Repair (IRR). For his demonstration, he needed to bring the IRR up to working temperature, and used a forced air ceramic heater to do so. Unfortunately, during the presentation, the product was not performing well. To his surprise, Vern discovered that the product overheated 40°F / 22°C past its maximum temperature. That cost him a pallet of product and embarrassed him. Since then, Vern has used the Powerblanket® Hot Box.

powerblanket
patented technology

POWERBLANKET BULK MATERIAL WARMERS (HOT BOX) ARE PERFECT FOR COLD WEATHER STORAGE

- Preserve expensive materials without overheating or burning
- Peace of mind that materials are safely maintained at consistent temperatures
- Energy efficient design saves on operating costs
- Flexibility to adjust temperature (PRO model only)

The Hot Box pallet warmer can be easily assembled, disassembled, and reassembled. This makes it ideal for cold weather storage, freeze protection, transporting, job site heating, remote location use, and other heating requirements. Standard Hot Boxes hold product between 100°F and 120°F and optional adjustable thermostatic controllers allow temperatures to be precisely controlled.

AVAILABLE IN THREE PERFORMANCE LEVELS:

Powerblanket Lite Hot Box

- 2 sizes available: Fits 40"x48" or 36"x48" pallets
- 800 Watt design
- Preserves temperature sensitive material
- Quick and easy assembly for portability and storage
- Great solution for palletized products: paint, caulk, resins and epoxies, etc.
- Two side access doors on opposite sides
- Certified to UL/CSA/CE standards

The Powerblanket Hot Box

Offers all the features of the Powerblanket Lite Hot Box, plus:

- A durable, vinyl shell
- Higher wattage (1200 Watts) for faster heating times & more extreme

The Premium Hot Box

Offers all the features of the Powerblanket Hot Box, plus:

- A larger footprint (Fits 48" x 48" pallet)
- An internal steel frame
- The highest wattage (1440 Watts)
- A controller for precise temperature regulation

CERTIFIED TO UL/CSA/CE STANDARDS
 CONFORMS TO ANSI/UL STD 499
 CERTIFIED TO CAN/CSA C22.2 NO 130
